

PETRO 3003 Tiger

Flexible system solution for fuel transport

PETRO 3003 Tiger

Flexible system solution for fuel transport

Tiger measuring turbines for fuel products

Can be combined with PETRO 3003 Chem DEF measurement system

MMQ from 50 l and up to 3 wet hoses

Modular system solution with integrated FTL data communication

PETRO 3003 Tiger with Additiv pump

Rigid draw bar combination

PETRO 3003 Tiger

For rigid tank trucks and construction site fuelling

- Up to 3 pumped wet hoses with MMQ from 50 l
- Measured draining of pipes and measuring turbines
- Without air separator and without special fine filter
- Also available in an explosion-proof version

Can be combined with dipstick and DEF measurement system

- Can be combined in a single system with PETRO 3003 Chem and dipstick in the version PETRO 3003 Volutiger

Radio overfill prevention

- Guarantees standard EN 13616

Additives

- Up to 2 additive pumps and 4 additive tanks

FTL data communication and office connection

- Integration in dispatch/logistics office software
- Online diagnostics und update function

Features

- Metrological approval
- Time and cost savings
- Simple automatic product change
- Integration in office communication
- One solution and one platform for diverse applications
